概述		<p>a. The titles of the classes and subclasses provide a general indication as to the area to which the goods belong. Some goods may be covered by more than one such title, however. It is therefore advisable to consult the Alphabetical List to make sure of the classification of various goods.</p> <p>b. Explanatory notes relating to a class are not repeated in the subclasses which they concern. It is therefore advisable to consult them when studying the notes appearing in the subclasses themselves.</p> <p>c. In principle, goods are classified first according to their purpose and subsidiarily, if this is possible, according to the object that they represent. This latter classification is optional.</p> <p>d. Where there is no special classification provided for goods intended to form part of another product, those goods are placed in the same class and subclass as the product of which they are intended to form part, if they cannot normally be used for another purpose.</p> <p>e. Goods, which are multipurpose composite objects are, with the exception of multipurpose composite pieces of furniture, placed in all the classes and subclasses that correspond to each of the intended purposes.</p>	<p>(a) 大类和小类的标题概括规定了该产品所属的领域。对于可能被多个标题所涵盖的产品, 可以参考按字母顺序排列的产品项列表确定产品的分类。</p> <p>(b) 大类的注释不在涉及的小类中重复, 因此研究小类时应参考大类的注释。</p> <p>(c) 原则上, 首先根据产品的用途进行分类, 其次, 在可能的情况下也可以根据其所代表的对象进行分类。后者是可选的。</p> <p>(d) 对于可以作为其他产品部件的产品, 若无专属分类, 而通常也不被用于其他用途, 则分入其构成产品所属的类别中。</p> <p>(e) 对于多用途的复合产品 (多用途复合家具除外), 应在与每种用途相应的类别中。</p>
